For instance, (Radetić-Paić, 2011), or if it is a quotation (Blažević, 2001, 51). If there are two authors, both should be specified (Tatković and Močinić, 2012), and if there are more than two, the surname of the first should be specified and the research associates added (Diković et al., 2016).

Footnotes should be solely used as comments or supplements, or as explanations of what has been written in the text.

All the papers referred to or quoted should be listed at the end of the paper, in alphabetical order according to the author's surname. For instance:
