Letter of Invitation to Give a Talk and Participate at COET2013

Esteemed and Honorable Colleagues,

The Program Committee of the International Conference *Economics in Crisis – The Crisis of Economics (COET2013)* would like to invite you (with great pleasure and distinguished honor) to give a talk or present your paper (poster) and participate in **The 6th International Scientific Conference "The Changing Economic Landscape: Issues, Implications and Policy Options; Economic in Crisis - The Crisis of Economics"** to be held in Pula, Croatia in May 30th- June 1st 2013. COET2013 highlights areas of research with the greatest potential to benefit economic science, relief financial crisis and succor society in the time of economic turmoil. Our common goal through the publication of the **Book of Proceedings indexed in EBSCO, Proquest and EconLit and Special issue of the Economic Research journal indexed in Web of Science** is to assist the progress of economic science and joint efforts of overcoming the World Crisis. It will not be possible to give an unambiguous, scientifically and in real life applicable answer to the question - whether fiscal austerity boosts or harms economic growth? We hope the Conference will serve as a round table think thank for some of the greatest minds in economics of today but also future young generations of economists to answer the question by getting involved in solving unforeseeable consequences of the world global crisis, which by the way, is certainly not over yet.

This Conference will identify priority areas in all field of economics and interrelated fields that are considered to have the greatest impact to the science of economics. Thus, COET2013 has been organized as a forum of state-of-the-art discussions in a great number of topics (related to deep problems of economics life in our time), which will be covered, by several internationally recognized and distinguished invited talks and other presentations (papers, posters). We plan a number of events, workshops, roundtable discussions, and an outstanding scientific and social program.

As a leading scientist in the area of Economics and related fields, we highly value your participation in this conference. We appreciate if you could let us know your immediate intention to attend at your earliest convenience if you accept our invitation. Please see attached the COET2013 Call for Papers and a Letter of Invitation.

We thank you in advance for your kind and favorable response to this invitation and an early reply. If you cannot attend we would be grateful if you could kindly suggest any other persons from your organization to give their perspective. In addition, all correspondence should be directed to the Conference Secretariat (& contacts):
